

# CyberRookie Project Overview V2.0

## Introduction

- Self-studying group
- To be quality cybersecurity analyst on defense side
- Foucs on using free resource/open-source cyber tools to practice hands-on skills
- Learning cyber skills from cybersecurity best practices
- Learning cyber skills by building a homeLab
- Learning cyber skills by Security Framework
- Created by Trevor Shi
- Version 2.0 02/25/2021

## Goals

- Get good understanding in IT fundamental/cyber fundamental
- Gain hands-on Cyber experience
- Get IT / Cyber Certification

## Learning Method

- Learning by Group sharing
  - Learning from Group Presentation
  - Group meeting presentation
- Learning by self-studying
  - Documentation/PDF/blog/book
  - Youtube
  - Google/Blog
- Learning by doing
  - Build Cyber HomeLab
- Learning by teaching
  - Weekly group presentation
  - Upload Youtube channel video

## Course Overview

- |               |                                |
|---------------|--------------------------------|
| Week 1 Lesson | Intruduction & Course Overview |
| Week 2 Lesson | Virtualization                 |
| Week 3 Lesson | Firewall                       |
| Week 4 Lesson | AD Server & MS365              |
| Week 5 Lesson | Linux Server & Web Server      |
| Week 6 Lesson | Monitoring and SIEM            |
| Week 7 Lesson | Vulnerability Assessment       |
| Week 8 Lesson | CIS Control                    |

## Main Learning Materials

- Lab Building
- CIS Benchmark
- CIS Control
- Security Framework
  - NIST Framework

## Learning Object

- IT Infrastrcture
  - Vmware ESXi
  - Windows Server
  - Linux
  - Web Server
  - MS365
- SOC Infrastructure
  - Firewall
  - IDS/IPS
  - Security Monitoring
- Risk Assessment
  - Splunks E-learning withCertification
    - SEIM
  - Qualys E-Learning with Certification
    - Qualys
  - Neuss E-Learning with Certification
    - Neuess
- Hardening and Audit
  - CyberSecurity Best Practices
    - CIS Benchmark
    - CIS Control

## Levels of Learning

- |  |                             |
|--|-----------------------------|
| Know what it is                            | Knowledge and Understanding |
| Deployment, Management and Troubleshooting | Application and Analysis    |
| Hardening and Audit                        | Synthesis and Evaluaton     |

## Functions

- IAM
- DLP
- UTM
- IPS/IDS
- Firewall
  - PfSense/OPNsense
- Risk & Compliance Management
- EndPoint Security
  - AV
- SEM/SIEM
  - ELK
  - Splunk
  - Security Onion
- Disaster Recovery
- DDOS Mitigation
- Encryption
- Web Filtering
